

ETCHINGS BY KARL J. BELSER

Karl J. Belser gave the drawings below to Percy Harold McGauhey (1904 – 1975) in the early 1930s. Belser and McGauhey were professors of Architecture and Civil Engineering respectively at the Virginia Polytechnic Institute (Virginia Tech today).

Belser and McGauhey were apparently life long friends because Larry Belser remembered being in Professor McGauhey's house at Berkeley, CA in the 1070's. Larry was then a doctoral student at UC Berkeley.

Nephew Sid McGauhey gave the drawings to Karl A. Belser in the fall of 2009.
